

KEY TO CONCEPT MAP - Perpetuating cycles in Chronic Disease - Russell Malcolm 2004

R = rational domain

E = emotional domain

S = somatic domain

P = physiological domain

I = immunological domain

$M_R$  = rational memory including maxims

(max· im 'mak-səm. : learned principle, or rule of conduct. Mother's favorite maxim was "Don't count your chickens before they hatch."8 Nov 2022)

$M_E$  = emotional memory (the emotional subconscious generates phobias and some dreams)

$M_S$  = tissue 'memory' (as seen in replay symptoms and various recurrent local phenomena)

$M_P$  = physiological 'memory' (mostly dysregulated states, sometimes non-allergic sensitivity)

$M_I$  = immunological memory

M = all include epigenetics, transgenerational phenomena, miasms.
